

PROGRAMME

Economic Evaluation in Health

Wednesday, 23 September 2026 · 09:30 to 16:30 · AIIMS Bhopal

TIME	SESSION	WHAT IT COVERS	FACILITATOR
09:30 – 09:40	Registration and welcome	Sign-in, workshop folder, and how the day will run.	
09:40 – 10:00	Where economic evidence enters health policy	How decisions about what the health system pays for are actually made in India, who asks the questions, and where clinicians and researchers come into it.	
10:00 – 10:40	What economic evaluation is, and what it is not	Opportunity cost. The two questions that sort every study into six boxes. Why a trial is a partial evaluation. CMA, CEA, CUA and CBA.	
10:40 – 11:20	Thresholds, opportunity cost and budget impact	Where a threshold comes from, India's own estimate, and why affordability this year is a separate test from cost-effectiveness.	
11:20 – 11:40	Tea		
11:40 – 12:35	Costing your own service HANDS-ON	Worksheet exercise. Micro-costing against gross costing, step-down allocation of shared overheads, annuitising capital, and where Indian unit-cost data already exists.	
12:35 – 13:15	Framing the question	Decision problem, comparator, perspective and time horizon – the four choices that decide the answer before any data are collected.	
13:15 – 14:05	Lunch		
14:05 – 14:45	Outcomes, discounting and the ICER	What a QALY actually is and where its weights come from. Why discounting makes prevention look worse. Average against incremental, and net monetary benefit.	
14:45 – 15:10	Modelling in half an hour	Decision trees and Markov models at reading level: why a model exists at all, what a cycle is, and what to distrust in a published one.	
15:10 – 15:25	Tea		
15:25 – 15:55	Handling uncertainty	One-way and probabilistic sensitivity analysis, the tornado diagram, and the cost-effectiveness acceptability curve.	
15:55 – 16:20	Group appraisal report-back HANDS-ON	Eight groups, paired by specialty. Four contrasting pairs of papers presented and defended, six minutes each.	
16:20 – 16:30	Close and feedback	What to do on Monday, where the material lives, and feedback forms.	

THE PAPER YOU ARE GIVEN AT REGISTRATION

Each group receives one published economic evaluation from its own specialty and works on it through the whole day, applying each principle to that paper as it is taught. By the last session the appraisal form in your folder is already complete.

AFTER THE WORKSHOP

The slides, the six interactive widgets, the appraisal form and the full reading list stay online at the address below, free to reuse and to pass on to your own students. Sessions include short live polls, so keep a phone to hand.
